CytRx Reports First Quarter 2018 Financial Results

LOS ANGELES - May 8, 2018 -- CytRx Corporation (NASDAQ: CYTR), a biopharmaceutical research and development company specializing in oncology, today announced financial results for the quarter ended March 31, 2018, and provided an overview of recent accomplishments and plans for its research and development programs.

"We've had a strong start to 2018, highlighted by the presentation of statistically significant breakthrough data for our four new albumin binding ultra high potency LADRTM (Linker Activated Drug Release) drug candidates at AACR 2018," said Eric Curtis, CytRx's President and Chief Operating Officer. "The potential competitive advantages of the LADRTM assets over antibody-drug conjugates are significant, including broader therapeutic utility and patient populations, lower risk of immune responses, lower cost of goods, simpler manufacturing, and no requirement for antibody receptors. Looking ahead to the remainder of 2018, we are laser-focused on securing a strategic alliance for the innovative LADRTM technology, with the goal of closing a transaction during the fourth quarter of 2018."

First Quarter 2018 and Recent Highlights

Eric L. Curtis is Named President and Chief Operating Officer. In early May 2018, CytRx announced that its Board of Directors had affirmed the appointment of Mr. Curtis to be the President and Chief Operating Officer of CytRx. Mr. Curtis will be part of CytRx's executive management team and will utilize his significant development and operational expertise to partner the Company's LADR™ technology and assets, as well as maximize the success of CytRx's scientific programs. He had previously served as an independent consultant for the Company's internal development efforts and external partner relationships. Mr. Curtis, who holds an M.B.A., brings more than 25 years of life science leadership experience to CytRx, with a proven track record in oncology and orphan diseases.

NantCell Inc.'s Aldoxorubicin Abstract Selected for Presentation at the American Society of Clinical Oncology 2018 Annual Meeting . In April 2018, CytRx highlighted that an abstract submitted by aldoxorubicin licensee NantCell, Inc., a private subsidiary of NantWorks, LLC, entitled *Lack of cardiac toxicity in patients treated with aldoxorubicin with doxorubicin equivalent doses beyond 1000mg/m²* was selected for a poster presentation at the American Society of Clinical Oncology (ASCO) 2018 Annual meeting, to be held June 1 - 5 in Chicago. Dr. Sant Chawla, Principal Investigator and Director of the Sarcoma Oncology Center in Santa Monica, California, will be the presenter. CytRx out-licensed global development, manufacturing, and commercialization rights for aldoxorubicin to NantCell, Inc. in July 2017.

Presented Statistically Significant Breakthrough LADRTM Candidate Data at the AACR 2018 Annual Meeting. In April 2018, CytRx presented three posters highlighting breakthrough data relating to its LADRTM drug candidates at the AACR 2018 Annual Meeting in Chicago. The posters describe the positive scientific findings that led to the Company's decision to select auristatin E (AE) derivatives LADR-7 and LADR-8, and maytansine derivatives LADR-9 and LADR-10, as the LADRTM candidates eligible to advance toward IND-enabling studies. The compounds demonstrated excellent, long-term antitumor activity across a wide range of human solid tumor cancer types, including lung, breast, ovarian, head and neck, renal cell, and melanoma. PDF copies of the presented posters (abstracts #1657, #2661, and #3703) can be accessed here.

Selected Four LADRTM Candidates Eligible for IND-Enabling Clinical Studies. In March 2018, CytRx announced that four LADRTM candidates are eligible for advancement into IND-enabling studies. These candidates, named LADR-7, LADR-8, LADR-9 and LADR-10 were chosen from two distinct classes of highly cytotoxic drugs, auristatins and maytansinoids.

Patterson Derivative Action is Dismissed. In March 2018, the Vice-Chancellor of the Delaware Court of Chancery ruled that CytRx's motion to dismiss was granted, with prejudice. *Patterson v. Kriegsman et al.*, C.A. No. 2017-0636-TMR.

Initiation of Pharma Partnering Activities for the LADR™ Ultra-High Potency Drug Candidates. In February and March 2018, CytRx made two announcements that highlighted efforts to strengthen its strategic alliance team. First, CytRx announced that it had entered into an exclusive agreement with Destum Partners, Inc., a leading strategic advisory firm serving companies in the life sciences industry, to assist in executing a strategic alliance for CytRx's LADR™ drug candidates. CytRx also announced that Mr. Eric L. Curtis, MBA, joined its team to provide strategic counsel to the Chairman and CEO for the Company's ongoing programs, including its LADR™ discovery platform and the ultra-high potency drug candidates. Mr. Curtis will foster introductions to strategic partners from his extensive network of big pharma and biotech companies. He brings a wealth of drug development and commercialization experience to CytRx, and he, along with Destum Partners, made introductions at AACR.

Partner NantCell Dosed First Patient in Clinical Trial Investigating Cell-Based Therapy in Combination with Multiple Anti-Cancer Agents, including Aldoxorubicin, in Patients with Metastatic Pancreatic Cancer. In January 2018, CytRx announced that aldoxorubicin licensee NantCell, Inc. (a private subsidiary of NantWorks, LLC) dosed the first patient in the Phase 1b portion of a Phase 1b/2 clinical trial for patients with metastatic pancreatic cancer. The trial will investigate high-affinity natural killer (haNK) cell therapy in combination with several anti-cancer agents, including aldoxorubicin, in patients with metastatic pancreatic cancer whose cancer has progressed on or following standard-of-care chemotherapy. This trial is a single-center, open-label, Phase 1b/2 clinical trial designed to evaluate the safety and efficacy of the various combination therapies with enrollment expected to be approximately 173 patients. The primary endpoint for the Phase 1b portion of the trial is safety and the primary endpoint for the Phase 2 portion of the trial is objective response rate (ORR) by RECIST.

Partner NantCell Dosed First Patient in Clinical Trial Evaluating Aldoxorubicin in Combination with Immuno-Oncology Agents and Cell-Based Therapies in Patients with Advanced Squamous Cell Carcinoma. In February 2018, CytRx announced that NantCell dosed the first patient in the Phase 1b portion of a Phase 1b/2 clinical trial for patients with advanced squamous cell carcinoma (SCC) of either the head and neck or non-small cell lung cancer, the second trial conducted by NantCell to investigate haNK cell therapy in combination with several anti-cancer agents, including aldoxorubicin, in certain high unmet need cancer indications. This single-center, open-label, Phase 1b/2 clinical trial is designed to evaluate the safety and efficacy of the various combination therapies, including combinations with aldoxorubicin, in subjects with SCC who have progressed on or after platinum-based chemotherapy and anti-PD1/PD-L1 therapy. Approximately 65 patients are expected to be enrolled. The primary endpoint for the Phase 1b portion of the trial is safety and the primary endpoint for the Phase 2 portion of the trial is objective response rate (ORR) by RECIST.

First Quarter 2018 Financial Results

CytRx reported cash and cash equivalents of \$35.1 million as of March 31, 2018.

Net loss for the quarter ended March 31, 2018, was \$4.1 million, or \$(0.15) per share, compared with a net loss of \$11.0 million, or \$(0.60) per share, for the quarter ended March 31, 2017, a reduction of \$6.9 million. Net loss decreased by approximately 63% for the quarter ended March 31, 2018. During the first quarter of 2018, the Company recognized a non-cash gain of \$0.45 million on the fair value adjustment of warrant derivative liabilities related to warrants issued in 2016, compared to a non-cash loss of \$32,000 during the first quarter of 2017 related to now expired warrants.

Research and development (R&D) expenses were \$1.5 million for the first quarter of 2018, which were primarily incurred for preclinical development of the new LADR™ albumin-binding, ultra-high potency drug candidates in the Company's Freiburg, Germany lab. This is a reduction of approximately \$5.3 million compared to R&D expenses of \$6.8 million for the first quarter of 2017, which included clinical development expenses for aldoxorubicin.

General and administrative (G&A) expenses were \$2.5 million for the first quarter of 2018, compared with \$3.0 million for the first quarter of 2017, including non-cash stock-compensation expense of \$0.4 million for the first quarter of 2018 as compared to 0.6 million for the first quarter of 2017. G&A expenses decreased by approximately 17 percent primarily due to a decrease in legal fees.

About the LADRTM Technology Platform

CytRx's innovative LADRTM (Linker Activated Drug Release) technology employs a broad portfolio of novel linker molecules that selectively bind to circulating albumin and can be linked to a wide variety of anti-cancer payloads. The Company's research efforts currently center on creating new molecules from the combination of ultra-high potency cytotoxic payloads with tunable linkers. The molecules that CytRx is currently evaluating concentrate at the tumor site providing targeted delivery of the cell killing payloads.

About CytRx Corporation

CytRx Corporation (NASDAQ: CYTR) is a biopharmaceutical Company specializing in research and clinical development of novel anti-cancer drug candidates that employ linker technologies to enhance the accumulation and release of drug at the tumor. CytRx is rapidly expanding its pipeline of ultrahigh potency oncology candidates at its laboratory facilities in Freiburg, Germany, through its LADRTM (Linker Activated Drug Release) technology platform, a discovery engine designed to leverage CytRx's expertise in albumin biology and linker technology for the development of a new class of potential breakthrough anti-cancer therapies. Aldoxorubicin, CytRx's most advanced drug conjugate, is an improved version of the widely used anti-cancer drug doxorubicin and has been out-licensed to NantCell, Inc.

Forward-Looking Statements

This press release contains forward-looking statements. Such statements involve risks and uncertainties that could cause actual events or results to differ materially from the events or results described in the forward-looking statements, including risks and uncertainties relating to the ability of NantCell, Inc., to obtain regulatory approval for its products that use aldoxorubicin; the ability of NantCell, Inc., to manufacture and commercialize products or therapies that use aldoxorubicin; the amount, if any, of future milestone and royalty payments that we may receive from NantCell, Inc.; our ability to develop new ultrahigh potency drug candidates based on our LADRTM technology platform; and other risks and uncertainties described in the most recent annual and quarterly reports filed by CytRx with the Securities and Exchange Commission and current reports filed since the date of CytRx's most recent annual report. All forward-looking statements are based upon information available to CytRx on the date the statements are first published. CytRx undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
